Customer Relationship Management

A cloud-base customer-centric business tool which help you manage your backend operation easily & professionally.

Lead Management

Keep track of leads in one place and easily follow their progress. Ability to auto import leads from email, add notes, create proposals. Organize your leads in stages and change stages easily with drag and drop.

Customer Management

Easily manage your customers and their contacts, create multiple contacts for your customers and set proper permissions. Customers area is fully separated from the admin area.

Web to Lead Forms

Create unlimited web to lead forms and inject in your landing page or website. The visitors can then enter their names, email addresses, upload attachments and other basic information, allow them to request quotes directly from your website.

Send Surveys to Leads & Customers

Create surveys and impress your customers. Add your question and improve your company productivity. Ability to send surveys to leads/customers/staff members and manually created mail lists.

Proposals

Create good looking proposals for leads or customers and impress your potential clients or customers to increase sales. Include images, tables, items, youtube videos, with the powerful editor. Proposal comments allowed for negotiation.

Quotations

Create quotation within a minute, sent to your customers and wait to accept, add notes for better organization for your next actions, create reminders. Ability to auto convert the quotation to invoice after customer accepts.

Contracts

Use contracts feature to lock in current and future sales. Create PDF documents in a minute and send to your customers via built-in sending contracts feature. Ability to send customer reminders before contracts expiry.

Web Maintenance

No one to help you maintain & protect your website & CRM? No worries, we do it for you.
